

The Mirror glossary

MirrorTalk is a tool for reflecting that can be customized by teachers for assessment, creative thinking, motivation, and more. Each reflection brings AI-powered insights on how students are thinking and how to help them improve.

Reflection

examining one's learning experiences, analyzing their significance, and extracting meaningful insights that can be applied to future learning and growth

Mindset

attitudes, beliefs, and dispositions toward learning

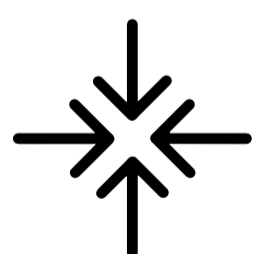

Insights

data points produced by Mirror that help teachers develop a deeper and more accurate understanding of their students through their reflections

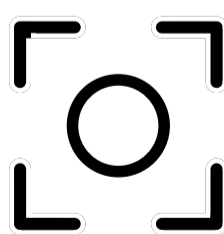

Feedback

after reflection, Mirror immediately identifies areas where participants can focus their efforts to deepen their understanding

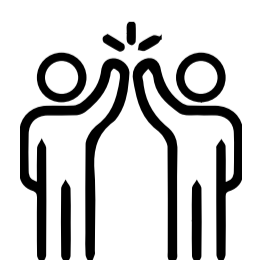

Objective

specific learning goals or outcomes a teacher wants their students to achieve

Focus

specific lens or framework a teacher wants their students to reflect on their learning (e.g. SEL, Depth of Knowledge, 21st Century Skills)

Engagement

a student mindset that is ready to absorb new information or experiences
